

Release Notes for OnTime Group Calendar 9.6.2 - including Discovery 3.2.5

Improvements

- The Actions '**OnTime**', '**OTAdmin**' and '**OTPush**' from the server option profile document, is now available on view level for selected documents in the view "Server options".

it gives the possibility to select and run OnTime task on multiple servers simultaneously.

- Registration symbol ® is added to db title and about doc.

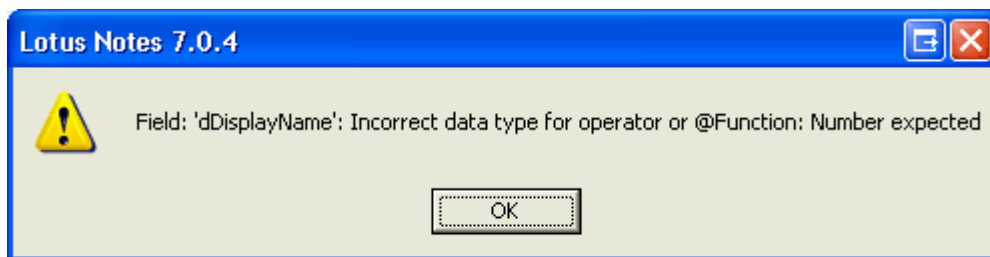

**OnTime® Group Calendar version 9.6.2
Calendar**

- Twisties in views are now change to windows look.

Bug fix

- One of the views for webinterface ("**fWebByNameDate**") had wrong bar size. It is now changed.
- Selecting "Appointment"- "New Appointment" was creating a entry in the private mail database, where entry was the users default entry (often Meeting) This has now changed so created what user choose
- Since it is not useful to assign a discovery settings for a resource, the assignment that is given through the Add-Remove botton will now be ignored. The assignment does not show in view and the sync-code will ignore a possible assignment.
- When opening a document from the Time Off view, it gives an error message. It is now fixed.

- Modifying a reservation in standard R&R can result in fieldtype change. So while sync standard R&R documents, error occur and entreyes from private calendar, is not synchronizing with OnTime Group Calendar. It is now fixed.
- Approval Workflow: After removing all calendars for a person and readd one again, a field was set as wrong type, giving runtime error during sync. This i now fixed.
- Approval Workflow: If trying to open mails from Calconn.nsf, it cannot locate Form. The form was missing and no default form was available. Now a form is created.
- In Discovery Launcher's user documents, there was a "Data Directory" field. This was a leftover from earlier versions of Discovery (Viewer) and this field is not used anymore. It is now removed.

Translations

- Following translations is made:
 - Column "Subject" was not translated in view "Resources/Tomorrow"
 - Column "To" was not translated in view "Category/Name"
 - Some swedish translation is updated
 - The new web buttons for opening calendar and new entry was not translated.
 - In request form the Type was not translated in German:
"Appointment" = Termin
"All day event" = Ganztägig
 - First column in "All" - "Reason" was not translated in other languages

Discovery

- From Discovery, it is now possible to create Receptionist
